PD103 Environmental Policy

ERG Group Environmental Policy

ERG Group, consisting of ERG (Air Pollution Control) Ltd, ERG APC Maintenance Ltd and ERG (Plastic Fabrication) Ltd, recognises that its operations have an impact on the environment. Our business is all about improving our environment by abating air pollution. We are therefore committed to minimising any adverse environmental impacts which might be caused by the way in which we go about our business. The company aims to improve its practices so helping to generate positive environmental impacts in this country and the wider community. ERG Group wishes to display positive environmental behaviour, in order to improve the quality of life of their customers, neighbours and employees.

This policy statement aims to fulfil the company's obligations under our environmental management system that meets the requirements of ISO14001. This policy is reviewed annually, amended where necessary and circulated to all involved.

Policy Statement

The ERG Group environmental policy is to:

- Continually strive to improve our environmental performance through setting stretching environmental objectives and targets.
- Ensure compliance with relevant environmental legislation and regulations.
- Implement procedures to prevent pollution by the Company's activities, particularly through accidental emissions or effluent discharges.
- Monitor and reduce the impact of our activities on the local and general environment through the use of appropriate performance indicators.
- Use our procurement processes to ensure that we obtain products and services from sustainable and environmentally responsible sources including local suppliers where possible.
- Reduce the Company's carbon emissions and the consumption of water and other resources, with a target of >2.5% year on year reduction in carbon emissions normalized by turnover.
- Ensure that waste generated by the Company is reduced, reused or recycled where possible and the remainder is disposed of responsibly.
- Operate an environmentally responsible vehicle fleet to promote the use of more environmentally friendly modes of transport.
