

## NEWS RELEASE

### Supply of 6 Odour Control Systems for Scotland

**Horsham, West Sussex, 2 April 2008.** ERG has recently been awarded the contracts to design, supply and install 6 odour control systems in Scotland. All are supplied by ERG as part of their odour control framework agreement with Scottish Water.

Totalling £850k, the contracts are through Galliford-Morgan Joint Venture (GMJV) in western Scotland, for sites in Annan and Glasgow (Laighpark, Paisley and Shieldhall). All were awarded in October 2007 and have been delivered on time and in budget, to achieve the Scottish Water commitment to have the systems complete and commissioned by 31st March 2008.

All six systems are enhancements to existing sites and comprise extensive ductwork, duty/standby fans and a dry media filter, and also include the MCC controls and outlet H<sub>2</sub>S monitoring system. At Annan, ERG also provided a design study to investigate how best to upgrade the existing, underperforming odour control plant.

Olfactometric testing as part of the contract has shown the systems to be exceeding the design requirements, with non-detectable outlet odours at each site (measured using EN-13725) compared to the guarantee value of <500 ouE/m<sup>3</sup>

#### **About ERG (Air Pollution Control) Ltd.**

ERG (Air Pollution Control) is a leading supplier of air pollution control systems and services with a 30 year track record, providing turnkey tailor made solutions that are optimised to give the best technical solution for the lowest capital and running cost.

Based in Horsham, near Gatwick airport ERG has satellite offices around the UK, a branch office in the Middle East, and a global network of V-tex™ technology licensees.

ERG specialises in odour control systems; V-tex™ scrubbing, stripping and condensing technology; soluble contamination capture and recovery; particulate removal systems; hazardous waste flue gas cleaning systems, and VOC contamination abatement.

APC Process Engineering Ltd was acquired by ERG in early 2008. APC Process Engineering Ltd. has built up an enviable reputation and unparalleled depth of expertise over 35 years within the air pollution control market by offering turn-key systems and design consultancy to blue-chip clients across diverse processing industries, such as Pfizer, Pirelli and Westinghouse, and Alcoa.
