

## How A Carbon Bed is Used Up

In this example, dirty air containing an odour is treated in a carbon filter with a bed life of 4 months. Watch what happens to the proportions of unused and spent carbon as the time passes.

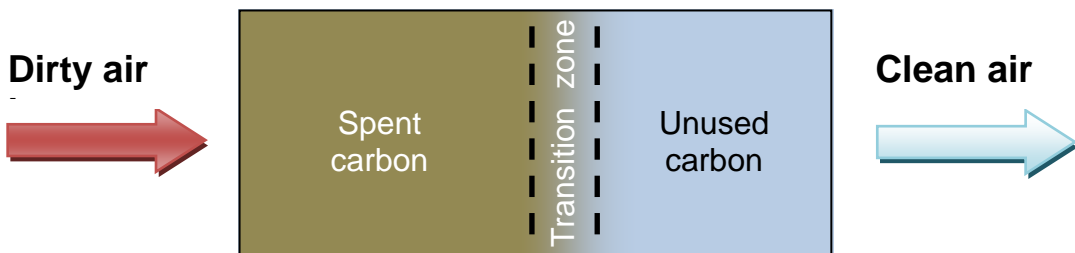

### 1. Fresh Carbon Bed – 0 months of

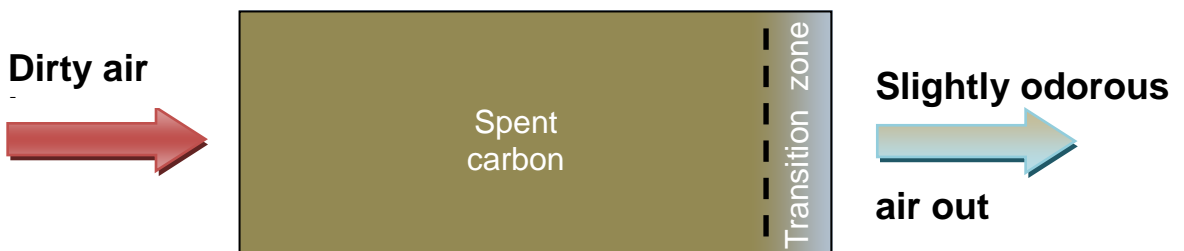

### 2. Partially Spent Carbon Bed – 1 months of use

### 3. Partially Spent Carbon Bed – 2 months of use

### 4. "Breakthrough" of odour – 4 months of use

### 5. "Saturated" Carbon Bed – more than 4 months of use
