

Maintenance

Protect your reputation and save money

Technology
for a
Sustainable Future

Minimising non-compliant emissions to atmosphere by regular, planned maintenance protects your reputation and saves you money.

Let ERG's Maintenance Department help you keep your air pollution and odour control systems running effectively and at the lowest operating costs.

Our specialist mechanical and electrical engineers are experts in maintaining most types of air pollution equipment and always work to the highest safety standards. We often save clients many thousands of pounds by repairing and enhancing dilapidated air pollution and odour control equipment.

Find out more about our maintenance services, including:

Comprehensive refurbishment

- Scrubber and vessel internal cleaning, inspection and repairs
- System recommissioning/optimisation to improve operating efficiency
- Pipework, ductwork and electrical repair
- Ductwork balancing
- Performance checking using Dräger tubes, H₂S Jerome analyser or olfactometric odour bag sampling
- Recalibration of instrumentation and re-commissioning

Maintenance

Protect your reputation and save money

Technology
for a
Sustainable Future

Planned and routine maintenance

- Development of planned maintenance schedule to suit your needs
- Carbon and other dry media condition assessment and replacement
- Replacement of spent bio-media, failed scrubber internals and other air pollution filter internals
- Inspection, cleaning, rejuvenation or replacement of fouled catalyst such as Odorgard™
- Descaling and desludging of scrubber and vessel internals using high pressure washing or concentrated acid washing, as required
- Operator training to maintain your air pollution control equipment

Reactive maintenance

- 24 hour-a-day, 365 days-a-year quick response reactive maintenance service, including on the spot electrical and mechanical repairs.

The industries that have already benefited from ERG's expertise include Water, Pharmaceutical, Chemical, Oil and Food.

Call Hamish McWillie, ERG's maintenance director 01403 221007 to discuss your maintenance program and to arrange a free site meeting.

ERG is the leading expert in air pollution and odour control maintenance in the UK and is a framework supplier for odour control maintenance to Southern Water, Thames Water and Scottish Water, regularly maintaining more than 120 sites.
