

Oxidiser process gas and quench air inject nozzle array and internal lining

PROJECT DETAILS

Client:

Mersen

Site:

Lanarkshire, Scotland

Application:

Graphite insulation materials manufacturing: furnace off-gas thermal destruction of VOCs

Equipment:

- High temp, gas-tight process gas ductwork and control valves
- Thermal oxidiser with multi-stream inlet gas manifold
- Natural gas fuelled burner package
- Fans and discharge stack
- Control panel and system

Year delivered: 2020
